IN THE CLAIMS:

Kindly cancel claims 27 and 28 without prejudice.

Kindly amend the remaining claims as follows:

1.   (Amended) A video program[me] reception method comprising
the steps of:
     storing in memory means a set of codes descriptive of video
program classifications,
     receiving a video signal and associated audio signal if
present,

receiving a program[me] classification code descriptive of

said video signal,

   accessing said memory means and comparing the contents

thereof with said code [with a pre-selected subset of codes],

and,

   if [according to] the result of said comparison indicates

that the received programme is to be displayed, causing the

received video signal to be selected for display,

   if the result of said comparison indicates that an

alternative video signal is to be displayed, causing an

alternative source of video signal to be selected for display;

and

   displaying the selected video signal on a video display

means.

Claim 2, line 1, delete "programme" and insert --program--.

Claim 3, line 1, delete "programme" and insert --program--.

4. (Amended)   A video programme reception method according to

claim 1, comprising the further [including the] steps of:

   inputting from the user a personal identity number,

   comparing said number to a stored number, and if said

numbers are equal,

   permitting the user to alter the codes stored within said

memory means [response resulting from receipt of various

classification codes].

Claim 5, line 1, delete "programme" and insert --program--.

Claim 6, line 1, delete "programme" and insert --program--.

Claim 7, line 1, delete "programme" and insert --program--.

Claim 8, lines 1, 2 and 3, delete "programme" and insert
        --program--.

Claim 9, lines 1, 2 and 3, delete "programme" and insert
        --program--.

Claim 10, lines 1, 2 and 3, delete "programme" and insert
        --program--.

Claim 11, lines 1, 2 and 3, delete "programme" and insert
        --program--.

Claim 12, lines 1, 2 and 3, delete "programme" and insert
        --program--.

Claim 13, lines 1, 2 and 3, delete "programme" and insert
        --program--.

14. (Amended) A video program receiver comprising:
    a video signal receiver,
    a program[me] classification code receiver,
    a program classification code memory,

means for <u>accessing said memory and</u> comparing <u>the contents</u>

<u>thereof</u> with received codes [with a pre-selected set of codes],

selector means equipped to <u>cause a received video signal to</u>

<u>be selected for display if the result of said comparison</u>

<u>indicates that the received program is to be displayed and to</u>

cause an alternative source of video signal to be selected for

display [according to] <u>if</u> the result of said comparison

<u>indicates that an alternative video signal is to be displayed,</u>

<u>and</u>

<u>means for displaying the selected video signal</u>.

Claim 15, line 1, delete "programme" and insert --program--

Claim 16, line 1, delete "programme" and insert --program--

17. (Amended) A video program receiver according to claim 14,

<u>further comprising:</u> [including]

means for inputting from the user a personal identity number,

means for comparing said number to a stored number,

and control means permitting the user to alter the <u>contents of</u>

<u>said memory</u> [response resulting from receipt of various

classification codes] only if the compared numbers are equal.

Claim 18, line 1, delete "programme" and insert --program--.

Claim 19, line 1, delete "programme" and insert --program--.
